# Form Meets Function

## Evolution in Fresh

The UC Evo Line is METTLER TOLEDO's most advanced line of counter scales. Capable of integrating with countless third party applications, the PC-based scales will become the hub of your fresh department. The large operator touchscreen with graphical presets makes it easier for operators to access the information they need. Its advanced functionality is matched only by its impressive design. Sleek and modern with a color, VGA, LCD customer display with in-store marketing capabilities, it's sure to impress. The UC Evo Line: where form meets function.

UC-CWQ Evo CT

### Performance in Color

With its faster processor, the UC-CWQ Evo CT is designed to meet the demands of third-party application integration. Offering a 5.7" color, VGA, LCD customer display, your store brand and logo are reinforced with every sale. The easy-to-operate and manage UC-CWQ Evo CT is our best-in-class and most economical choice for retailers who want ultimate ease-of-use. Models with an optional mounted scanner are available for both the UC-CWQ Evo CT and the UC-GT Evo CT.

UC-CWT Evo CT

### Ultimate Marketing Tool

Ideal for retailers wanting to increase sales and maximize the return on their investment. Through dynamic product marketing, the UC-CWT Evo CT facilitates more personal associate and customer interaction, right at the scale. Its lightning-fast processor and 12.1" color, SVGA, LCD customer display makes every transaction a superior shopping experience.

UC-GT Evo CT

### Self-Service

The UC-CWQ Evo CT and the UC-CWT Evo CT are both available as self-service options. They offer a compact, low profile scale with a 12.1" user touchscreen located at the height of the scale platter. As an alternative, the UC-GT Evo CT has an upper 12.1" operator touchscreen with the printer located on the tower, for easy access by the consumer when the scale is mounted on lower height stands. Models with an optional mounted scanner are available for both the UC-CWQ Evo CT and the UC-GT Evo CT.

The fast Intel® Atom 1.86 GHz Dual Core Processor is designed to meet the demands of third-party application integration.

The large 6" label roll capacity means less downtime changing label rolls.

The high resolution thermal printer supports all Windows® fonts and prints professional-looking labels that will reinforce your store brand and help build shopper loyalty.

The 12.1" color, VGA, LCD operator touchscreen with graphical presets is ergonomically designed to be adjustable, accommodating the varying heights of your associates.

# Enhance Your Brand

## Improve Shopper Experience

### In-Store Marketing

With capabilities to run visual sales promotions and cross-selling ad campaigns, the UC Evo Line will attract customers. Optional transparency settings allow for the PLU and weight information to display on top of promotional material.

### State-of-the-art Design

The sleek and modern profile of the UC Evo Line and LCD customer display (5.7" or 12.1" tower version) will enhance your store image. The adjustable angle customer display and swivel tower (on the UC-CWT Evo CT) will suit the requirements of your store and keep communication between customers and employees flowing.

### Label Printing

With extensive support for custom logos, pre-printed designs and complex layout requirements, UC Evo Line scale labels reinforce store brands and help build shopper loyalty.

# Promote Sustainability

## Increase Energy Efficiency

METTLER TOLEDO is committed to offering products that are sustainable. The UC Evo Line is our “greenest” product line to date, offering energy savings that are tangible. As with all of our products, the UC Evo Line scales contain no lead, no mercury, and no other hazardous substances, and our manufacturing process complies with strict guidelines from RoHS and WEEE. It’s an investment you can feel good about.

---

### LED Backlighting

Thanks to the latest LED technology, the customer and operator displays are brighter and more vivid with better contrast, all while reducing power consumption.

---

### Idle Modes

All of the scales feature energy-saving modes that can be configured using software.

---

### Energy Efficient Fan

Waste heat is dissipated via the aluminum housing. The scale fan operates only as needed.

---

### Faster Processor

The fast Intel® Atom 1.86 GHz Dual Core Processor provides enhanced computing performance while using less power.

# Integrate Applications

## Maximize Operational Efficiency

With the UC Evo Line of PC-based scales, integration options are endless. On the customer side, integrations include Fresh Look Promoter, deli queuing, and more. For operators, integrations include fresh item management, employee training, time-card management, equipment maintenance, and more. Accessing third-party applications is simple utilizing METTLER TOLEDO's Application Manager from the scale's home screen or integrating the application from within the PLU screen.

With the vast amount of processes your associates are responsible for on a daily basis, consolidating or integrating those systems can greatly help to simplify workflows and improve operational efficiency.

PLU Screen Integration

### Network Integration

In addition to integrating with other applications, the UC Evo Line of scales seamlessly integrate into existing IT infrastructures and are easily managed as PCs. Based on Windows Embedded Standard 7 or Linux, UC Evo Line scales leverage industry-standard management tools.

You can reduce the number of on-site service calls while dramatically lowering IT costs by automatically administering chain-wide updates.

### Boost Sales

The large 12.1" customer display is designed to present relevant marketing videos, animations, images, and text exactly when they are most effective. Each item selected by the operator can offer cross-promotions of related center-store items or other store promotions to customers. Integrating with Fresh Look Promoter facilitates this process by making it easier to create, manage, and distribute promotions and offers throughout your enterprise.

**Eye of Round Roast**

**Recommended Cooking Method:**  
Oven Roast

**Nutrition:**

- High in protein
- Carbohydrate free

### Empower Associates

Provide sales associates with the information they need to make suggestive selling and/or give expert advice to customers. Operators can access information including preparation instructions, "good-with" tips, and product information. Boost staff efficiency and lower training costs by putting professional selling information at associates' fingertips.

## Professional Services

### Uptime

METTLER TOLEDO offers support and repair services to ensure that your equipment meets the demands of your business. Service calls are made easy with around-the-clock availability, and delivery of parts is guaranteed through our strong parts logistics organization.

### Compliance

Ensure you stay compliant with government regulatory standards by partnering with a vendor who understands and anticipates these requirements. METTLER TOLEDO knows that accurate weighing, safe food handling, and compliant labeling support your store's operations.

### Performance

A METTLER TOLEDO service agreement is the most cost-effective solution for maintaining the reliability, safety, and accuracy of your equipment. Choose from a standard or tailored service agreement that is uniquely suited to meet your needs. We strive to make service simple, convenient, and cost effective.

### Expertise

Our certified service professionals can educate your operators with customized training courses, ensuring proper operation and maintenance. METTLER TOLEDO also offers software customization and integration services to meet your unique business needs.
