

Weigh Module SWB605 PowerMount™

Know What's Ahead

PowerMount™ is a further step in leveraging POWERCELL® technology for reliable production, avoiding faulty batches and for quick recovery.

Predict the performance of your weighing system at any time! SWB605 PowerMount™ using POWERCELL® technology monitors constantly your weighing equipment and sends out immediate alarm in case of failure or maintenance requirements.

With analog weighing technology the way sometimes is fuzzy because each cell's measurement is averaged and the single cell information is lost.

If one analog load cells fails it usually goes undetected until a periodic calibration.

"Driving analog load cells"

SWB605 PowerMount™ with POWERCELL® technology delivers load cell diagnostics data and true digital weight values that can be monitored individually for errors!

"Driving POWERCELL®"

Easy Calibration with CalFree™ Plus

PowerMount™ also features easy calibration with automated CalFree™ Plus. This enables calibration without test weights or where use of test weights is impractical.

Recover your Tank without Recalibration

POWERCELL® enables to replace load cells without emptying and recalibrating your tank system. Instead of hours it takes minutes to continue production.

POWERCELL® uses connectors. Cables can be replaced in minutes without touching the weighing performance at all

Eliminating Error Sources

With POWERCELL®, load cells are connected in a daisy chain network.

PowerMount obsoletes junction boxes, a well-known source of weighing system failure. The entire system design supports the replacement of load cells and cables without labor-intensive recalibration for significant savings of time and effort.

Consider upgrading analog weigh-module systems to PowerMount™ technology, which is available in superior accuracy up to OIML 10'000e and NTEP 10'000d to meet a variety of weighing needs. When you do, you will gain the benefit of predictive diagnostics, easier system maintenance, smooth weighing processes, and enhanced product quality.

Of course SWB605 PowerMount™ provided best in class safety and service features make installations easy and failure proof.
